

# **FINAL PUBLIC NOTICE**

The Federal Emergency Management Agency (FEMA) has received a subgrant application for Antioch, City of, Contra Costa County, CA. Pursuant to Executive Order (EO) 11988 and 44 CFR Part 9.12, final notice is hereby given of FEMA's intent to provide funding for this project under the Public Assistance Grant Program (PA).

An initial disaster-wide Public Notice for DR-4683-CA was published September 11, 2023. Funding for the proposed project will be conditional upon compliance with all applicable federal, tribal, state and local laws, regulations, floodplain standards, permit requirements and conditions.

Under the National Environmental Policy Act (NEPA), federal actions must be reviewed and evaluated for feasible alternatives and for social, economic, historic, environmental, legal, and safety considerations. EO 11988 and EO 11990 requires FEMA to consider alternatives and provide a public notice of any proposed actions in or affecting floodplains or wetlands. This notice may also fulfill requirements under Section 106 of the National Historic Preservation Act (NHPA).

This notice serves as a project-specific final notice for FEMA's funding action located within a Special Flood Hazard Area. FEMA has determined the only practicable alternative is to fund embankment repair. This action complies with the National Flood Insurance Program (NFIP) requirements. There is a potential for the facility to be impacted by future flooding events due to its location within the AE zone. The proposed work will not take place in wetlands per the United States Fish and Wildlife Service National Wetlands Inventory and will have little potential to impact or affect wetland values.

**Proposed Work and Purpose:** During the incident period of December 27, 2022 to January 31, 2023, a severe winter storm damaged engineered creeks within the city. The project plans to

utilize contracts to repair embankments. Mitigation may be achieved through an alternate method of repair. Regarding West Antioch Creek – G St, contracts may install a retainer wall, place rip rap rock, and place vegetative barrier. Regarding West Antioch Creek – Enea, contracts may place rip rap and vegetative barrier.

**Project Alternatives:**

- (1) *(No Action)* This alternative would result in a risk of additional damages. If the damage is not repaired, then adverse economic and social impacts may occur and continued negative impacts may be experienced.
- (2) *(Repair in-kind)* Repairs made in kind may result in similar damages from future flood events.
- (3) *(Relocation)* Floodplain avoidance by relocating the facilities is not a practicable alternative as the facilities are a part of the city's water management system. Any minute changes to the plan may result in changes to the overall system.
