SECTION III: PROJECT DETAILS

Capital Improvement Program Overview

Program Objective

The primary objectives of the City of Antioch's Capital Improvement Program (CIP) are:

- To provide professional and technical engineering services and support to all City Departments related to facility expansions and improvements, infrastructure rehabilitation and development.
- To provide leadership in implementing Federal, State and Local programs.

The CIP relates the City's annual capital expenditures to a long-range plan for public improvements. California Government Code Section 66002 requires local agencies that have developed a fee program to provide the approximate location, size and timing of projects, in addition to an estimate for the cost of all facilities or improvements to be financed by fees. This is frequently done by the adoption of a CIP and is the process Antioch uses to meet this requirement.

The Capital Improvement Budget document is different from the Operating Budget document, but the two budgets are closely linked. The Capital Improvement Budget, as distinguished from the Operating Budget, is used as a planning tool by the City to identify specific Capital Improvement needs consistent with the financing and timing of those needs in a way that assures the most responsible and efficient use of resources.

Projects within the City's CIP are allocated over five years using both existing and projected revenue sources. The CIP staff:

- In consultation with other departments, determines upcoming capital needs.
- Prepares bid packages (plans, specifications, and estimates) for the needed projects or prepares procurement documents, as needed.
- Provides project management and oversight during and after construction.

The CIP is a five-year plan to guide the construction or acquisition of capital improvements and includes the capital budget for the upcoming fiscal year, which is authorization from the City Council to expend dedicated revenues for specified projects. Prior to adoption by the City Council each year, the CIP is reviewed by the City's Planning Commission to assure its consistency with the City's current General Plan.

The five-year CIP is reviewed annually to enable the City Council to reassess projects in the program. Project expenditures for outlying years beyond this fiscal year are provided in the CIP for planning purposes only and do not reflect a Council commitment of funds.

Capital Improvements Division Personnel:

Scott Buenting Acting Public Works Director/City Engineer

Mitchell Loving Junior Engineer

Sal Rodriguez Senior Engineering Technician

Lori Medeiros Administrative Analyst I

Julie Viray Administrative Analyst I

CIP Process

The CIP is developed as a coordinated effort between the CIP staff and the Director of Finance.

The annual CIP process begins with a memo and a CIP Project Request form sent out to all City departments requesting proposals for capital projects. New CIP project requests are evaluated and prioritized based on goals and objectives of the City Council, as well as available funding, consequences of not completing the project, and the impacts on the operating budget. Some projects have specified funding sources, such as assessment districts, Federal and State grants, or special fees.

The Draft CIP is prepared by Capital Improvement staff and reviewed by the Finance Department before being circulated and approved by the Planning Commission and presented to the Parks & Recreation Commission and the City Council as part of the annual review. The Final CIP budget is presented to the City Council in June and is adopted concurrently with the annual operating budget.

Capital Improvement Program Categories

Community Facilities

This category includes new and renovated public buildings, as well as the Marina. The majority of the projects in this category are located in the City's former redevelopment areas.

Parks & Trails

This category includes improvements and renovations for local and community parks, open space, and trails in the City.

Roadway Improvements

This category includes new streets, street widening, street rehabilitation, cape seals, sidewalk repair program, and the City's Pavement Management System.

Traffic Signals

This category includes new traffic signals and signal modifications throughout the City.

Wastewater and Storm Drain Systems

This category includes extensions, replacements, rehabilitations and modifications of the sewer and storm drain system.

Water Systems

This category includes projects related to the Water Treatment Plant, and extensions, replacements, rehabilitations and modifications of the water distribution system.

Fund Name

Fund Description

Capital Improvement Fund

This fund was established to set aside money from the General Fund for any Capital Improvement project not provided for in one of the other funds, such as parks and community facilities improvement projects. Revenue sources for this fund are annexation fees and the proceeds of the sales of surplus properties. The City may transfer General Fund dollars to the Capital Improvement Fund as funding becomes available. Decisions to transfer funds from various funding sources to the Capital Improvement Fund are made annually by the City Council.

Road Maintenance and Rehabilitation Account (RMRA) Fund

The California SB1 Act included RMRA funding to support maintenance and safety improvements on highways, local streets and roads, and bridges that do not meet state performance criteria.

Gas Tax Fund

The City receives gas tax funds from the State of California, as provided by the State Street and Highways Code. The gas tax funds are limited to research, planning, construction, improvement, maintenance, and operation of public streets. The City also uses these funds to pay for maintenance and operation of streetlights and traffic signals.

Marina Fund

This fund accounts for the operation, including capital improvements, of the City's Marina and the Fulton Shipyard Boat Ramp. Funds are collected from lease agreements, berth rentals and launch fees.

Fund Name	Fund Description
Measure "J" Return to Source	The source of money for this fund is the voter approved one-half cent sales tax. Provided the City has complied with the Growth Management Program, each year the City receives return to source funding from the Contra Costa Transportation Authority to be used for transportation improvement and maintenance projects.
State Revolving Fund (SRF) Loan	The City of Antioch was granted a loan from the State of California for the design and construction of the Brackish Water Desalination Plant.
Traffic Signal Fund	Fees are collected from developers to fund offsite traffic signals.
Water & Sewer Related Reserve Funds	The City collects user fees and developer fees to fund offsite water and sewer facility improvements. The fees are placed into one of the following four funds: • Water Fund • Sewer Fund • Water System Improvements Fund • Sewer System Improvements Fund
National Pollutant Discharge Elimination System Fund (NPDES)	The National Pollutant Discharge Elimination System was mandated by the Clean Water Act of 1987 to reduce storm water related pollution. The program is funded by a parcel assessment.
Funding Agreement for the Northeast Annexation Infrastructure Improvement	In 2013 the City entered into reorganization and a property tax revenue allocation agreement with Contra Costa County for the annexation of the northeast area. Per the agreement, the City will receive property tax revenue from the Contra Costa County for the construction of the infrastructure improvements needed within the northeast annexation area.

Fund Name

Fund Description

Delta Fair Property Fund

This fund was created when the City sold property it owned on Delta Fair Boulevard at the City's western City limits. The property was originally purchased from the State on the condition that it is to be used for public purposes. When it was decided that the property was more suitable for commercial use and should be sold or leased, the State gave its permission on the condition that the proceeds be used for park purposes.

American Rescue Plan Act (ARPA)

ARPA is a federal stimulus bill to aid public health and economic recovery from the COVID-19 pandemic. The plan includes \$350 billion in emergency funding for state, local, territorial and tribal governments, known as the Coronavirus State and Local Fiscal Recovery Funds.

Recreation Fund

This fund provides programs that focus on youth and family enrichment, healthy lifestyles, sports and fitness and services for older adults. The Parks and Recreation Department maintains a variety of facilities and spaces that are hosted by city programs and are also available for reservation by residents. Recreation Services ensure that all residents have access to the benefits of local parks and recreation.

Grant Name	Grant Description
Congestion Mitigation Air Quality (CMAQ)	CMAQ funds are federal funds used to reduce emission from vehicle travel and provide alternatives to driving alone. Signal timing is another example of emission reduction.
Community Development Block Grant (CDBG) Fund	This fund accounts for grant funds received from the Federal Government for the purpose of developing community programs and urban renewal projects.
Highway Safety Improvements Program (HSIP)	The purpose of this federal-aid program is to achieve a significant reduction in fatalities and serious injuries on all public roads. The Hazard Elimination Safety (HES) is included in this program.
Transportation Development Act (TDA)	TDA provides state funding from sales taxes to each county and city, for transit operations and bicycle facilities.
Active Transportation Program (ATP)	Funding under this program is intended to encourage increased use of active modes of transportation, such as biking and walking. Safe Routes to School is now included in this grant program.
Surface Transportation Program (STP)	The program provides funding for construction projects to help preserve local streets and roads, such as rehabilitation, resurfacing, restoration, and roadway improvements.
Integrated Regional Water Management (IRWM) Prop 1 Grant	This program provides grant funds to projects that address drinking, waste, and storm water issues, especially for disadvantaged communities. Funds from this grant go to supporting the implementation of the project.

Grant Description

Proposition 1E Storm Water Flood Management Grant

The storm water management portion of Proposition 1E is designed for projects that manage storm water runoff to reduce flooding and are ready, or nearly ready to proceed to implementation. The Storm Water Flood Management Grants are being disbursed to local agencies through the Integrated Regional Water Management (IRWM) Grant program and provide a 50 percent cost match for the project.

One Bay Area Grant (OBAG 2) Program

The inaugural One Bay Area Grant Program (OBAG 1) was adopted by MTC in 2012 to guide \$827 million in federal funds over the five-year period from 2012-13 through 2016-17. OBAG 2 is the second round of OBAG funding and is projected to total roughly \$916 million to fund projects from 2017-18 through 2021-22. The OBAG 2 program is divided into a Regional Program, managed by MTC, and County Program, managed by the nine Bay Area Congestion Management Agencies (CMAs). The County Program is \$386 million over 5 years. Cities and counties can use these funds to invest in:

- Local street and road maintenance
- Streetscape enhancements
- Bicycle and pedestrian improvements
- Safe Routes to School projects
- Priority Conservation Areas (PCAs)
- Transportation planning

California Natural Resources Agency Grant

This funding was appropriated by the State Legislature in Senate Bill (SB) 129, Chapter 69 (Control Section 19.56 Enacted Budget), which was approved by Governor Newsom on July 12, 2021.

		N 1		
 יחרי	\ T	N 1-	m	\mathbf{a}

Grant Description

MTC's Pavement Management Technical Assistance Program (P-TAP)

This program uses federal dollars to help Bay Area cities and counties stretch their road budgets by:

- Implementing, updating and maintaining pavement management databases
- Providing accurate pavement condition data to city councils, county supervisors or other local decision makers
- Supporting the region's management of nonpavement street and road assets, such as signs, storm drains, curbs and gutters, traffic signals and streetlights as pilot projects

Proposition 68

The purposes of Prop 68 include creating parks, enhancing river parkways, and protecting coastal forests and wetlands. Prop 68 also provides funding for outdoor access, lower cost coastal accommodation and climate adaptation.

Safe Streets and Roads for All (SS4A)

This program funds regional, local and Tribal initiatives through grants to prevent roadway deaths and serious injuries.

One Bay Area Grant (OBAG 3) Program

This third round of OBAG funding was adopted by the MTC in January 2022 and includes more than \$750 million in federal funding for projects from Fiscal Year 2022-2023 to Fiscal Year 2025-2026. The OBAG 3 program is divided into a regional program, managed by MTC, and a county and local program, managed by MTC in partnership with the nine Bay Area County Transportation Agencies.

Special Funds

Roadway Maintenance Projects

The City of Antioch has approximately 336 centerline miles of roadway within City limits.

As part of the City Pavement Management System Program, the City of Antioch selected a pavement management consultant to perform a Pavement Management Update for the City by inspecting the pavement conditions of arterial, collector and residential streets.

The Pavement Management System Report, which was completed in 2020, rated the City's overall network condition as a 68 PCI (Pavement Condition Index). The PCI is a value on a rating scale from 0 to 100 (where 100 is equivalent to a new street). Approximately 52.8% of City streets have a PCI of 70 or greater ("Very Good"). According to the 2019 Pavement Management System Report, the City's current backlog (deferred maintenance) is \$114.2 million. Backlog is defined as the unfunded needs to bring the overall network condition to optimum levels (81-82 PCI).

Currently, the Pavement Management System is being updated, which will include the new Pavement Condition Index (PCI). It will also include the dollar amount of the City's deferred maintenance.

In addition to the City's Capital Improvement Program funds allocated to roadway improvements projects, the City's Street Maintenance Division also contributes to roadway improvements each fiscal year to resurface neighborhood streets and repairing or paving utility service cuts and utility trenches. The work is performed using a combination of City public works forces and private contractors as part of the City's local street and utility maintenance program.

Development Impact Fees and Park-In-Lieu Fees Projects

On March 25, 2014, City Council adopted the Development Impact Fees and Quimby Act/Park In-Lieu Fees, which became effective April 24, 2014. These fees are one-time charges on new development that are collected and used by the City to cover the cost of capital facilities and infrastructure that are required to serve new growth. Implementation of these future projects is based on the rate of growth, timing of fee collection, and full project funding. The following projects will occur beyond the five-year term of this document:

		FUNDING SOURCES		
EXPENDITURES	COST ESTIMATE	Development Impact Fees	FUTURE CIP (UNFUNDED)

Parks & Trails

Park Facilities Upgrade

Location: Citywide

Project Manager: Derek Traya

Estimated Completion: Ongoing Program

Project Description: This project will rehabilitate and upgrade aging park playground equipment and facilities throughout the City.

Justification: Upgrades to community parks help maintain a healthy community.

Funding Courses	Cı	ırrent		Proposed										Total

Pedestrian/ADA Improvements

Location: Citywide

Project Manager: Scott Buenting

Estimated Completion: Ongoing Program

Project Description: This project will construct new curb ramps in conformance with State and American with Disability Act guidelines and replace damaged sidewalks.

Justification: The project will improve pedestrian access by installing curb ramps and reducing hazards in the public right of way.

Funding Sources	Current		Total

Sidewalk Repair Program

Location: Citywide

Project Manager: Scott Buenting

Estimated Completion: Ongoing Program

Project Description: This program will replace concrete sidewalks, curb and gutter that have been damaged by tree roots or broken as part of an underground utility repair. The program also installs new curb ramps to improve pedestrian accessibility.

Justification: Overgrown tree roots and repairs to underground utilities damage sections of concrete curb, gutter, and sidewalk. The program helps to mitigate risks of trip and fall incidents throughout the City.

Pavement Management System Program

Location: Citywide

Project Manager: Scott Buenting

Estimated Completion: Ongoing Program

Project Description: This program evaluates City streets every two years based on pavement condition and provides pavement repair options. The City will seek a federal grant, P-TAP (Pavement Management Technical Assistant Program) to assist with the program.

Justification: A Pavement Management Plan is required as a condition of Measure "J" funding for street improvements. P-TAP Funding is often available for this work.

Pavement Surface Treatments

Location: Citywide

Project Manager: Scott Buenting

Estimated Completion: Ongoing Program

Project Description: This program provides pavement preservation treatments such as cape seal, micro-surfacing and other preventative maintenance treatments to extend the useful life of a roadway.

Justification: The program implements the Pavement Management System program and recommendations from residents.

Hillcrest Ave. Left Turn at Wild Horse Road

Location: Hillcrest Avenue at Wildhorse Road

Project Manager: Scott Buenting

Estimated Completion: 2024

Project Description: This project will extend the Hillcrest Avenue left turn pocket at Wildhorse Road.

Justification: Additional capacity is necessary for build out of the development to the east and future extension of Wild Horse Road to Slatten Ranch Road.

Traffic Signals

Traffic Signal: James Donlon Blvd./Metcalf St

Location: The intersection at James Donlon Boulevard and Metcalf Street

Project Manager: Scott Buenting

Estimated Completion: 2026

Project Description: This project will install a new traffic signal and related facilities at the intersection of James Donlon Boulevard /Metcalf Street and Laurel Road/Canada Valley Road

Justification: This facility is expected to improve traffic safety in the area following additional development.

Water Main Replacement Program

Location: Citywide

Project Manager: Scott Buenting

Estimated Completion: Ongoing Program

Project Description: This program replaces deteriorated water facilities to improve efficiency in the existing system as identified in the Water System Master Plan or as requested by the Water Distribution Division.

Justification: Portions of the existing water system are aging and/or have experienced failures due to deterioration and need replacement and upgrades.

Water Treatment Plant Operations

Location: Water Treatment Plant

Project Manager: Eric Houston

Estimated Completion: Ongoing Program

Project Description: This project will replace the granular activated carbon filters of both Plant "A" and "B".

Justification: The granular activated carbon filters must be replaced every four to five years to perform efficiently.

Water Studies and Planning

Location: Citywide

Project Manager: Scott Buenting

Estimated Completion: Ongoing Program

Project Description: This project will prepare and update various water studies and planning documents including the Water System Master Plan, Water Rate Study, Risk Management Plan, Urban Water Management Plan Update, Watershed Sanitary Survey Update, Groundwater Sustainability Plan, Integrated Regional Water Management Plan, Risk Resilience Assessment and Emergency Response Plan.

Justification: Various water related studies and planning documents must be completed for the City to be compliant with State and industry requirements.

Storage Reservoir Rehabilitation

Location: Citywide

Project Manager: Scott Buenting

Estimated Completion: 2026

Project Description: This project rehabilitates water storage reservoirs throughout the City. Work to be performed may include recoating, repainting, installation of mixers and sampling stations and seismic upgrades.

Justification: Maintenance and upgrades of water storage reservoirs are necessary to prolong their useful lives.

Water Treatment Plant Improvements

Location: Water Treatment Plant

Project Manager: Eric Houston

Estimated Completion: Ongoing Program

Project Description: This project will perform minor improvements at the Water Treatment Plant. The work may include replacement of deteriorating equipment, installation of new controls, construction of facilities, clearwell improvements and installation of a Zone 1 flow meter.

Justification: Upgrades to the plant are required to maintain and/or improve the efficiency of the facility.

Water Treatment Plant Solids Handling Improvements

Location: Water Treatment Plant

Project Manager: Scott Buenting

Estimated Completion: 2027

Project Description: This project will evaluate the existing solids handling and dewatering operation at the Water Treatment Plant and, if warranted, design and construct additional facilities.

Justification: Solids handling and dewatering are currently performed by a private contractor. This exercise will determine if a City owned system may be more cost effective.

Water Treatment Plant Drainage Capture

Location: Water Treatment Plant

Project Manager: Scott Buenting

Estimated Completion: 2025

Project Description: This project will re-evaluate the existing sludge lagoon. Work included in this project may include removal of accumulated solids, stabilization of banks and installation of decant/disposal system or constructing a new City owned facility.

Justification: The City may require additional capacity to accommodate emptying the clarifiers for routine or special maintenance.

Brackish Water Desalination

Brackish Water Desalination

Location: Water Treatment Plant

Project Manager: Scott Buenting

Estimated Completion: 2024

Project Description: This project will construct a 6 MGD brackish water desalination plant that would treat water from the San Joaquin River during times of high chloride content. The work will include the replacement of the City's river intake facility and install a new fish screen. Approximately 4 miles of pipeline will be constructed to convey brine concentrate from the water treatment plant to Delta Diablo.

Justification: This process will enable the City the ability to treat river water in times of drought and future dry conditions due to climate change and protect the City's Pre-1914 water rights.

Water Treatment Plant 'A' Filter Valves Replacement

Location: Water Treatment Plant

Project Manager: Scott Buenting

Estimated Completion: 2025

Project Description: This project will replace four aging filter valves in Plant 'A' at the Water Treatment Plant.

Justification: Four of the eight filter valves at Plant 'A' have been in the system for a long period of time and are currently leaking while in the closed position.

CDBG Downtown Roadway Rehabilitation Program

Location: Community Development Block Grant Area

Project Manager: Scott Buenting

Estimated Completion: Ongoing Program

Project Description: This project includes roadway rehabilitation, replacement of damaged sidewalk, curb and gutter, installation of new curb ramps and storm drain system modifications within the City's Community Development Block Grant area.

Justification: The existing pavement has deteriorated and drainage along the roadway is inadequate or no longer functioning. In addition, pedestrian access is severely restricted due to the lack of curb ramps.

Trash Capture Devices

Location: Citywide

Project Manager: Phil Hoffmeister

Estimated Completion: Ongoing Program

Project Description: This program will install full trash capture devices at various locations throughout the City to prevent trash from reaching the storm drain system, channels, creeks, and San Joaquin River. Locations will be determined depending on the type of device selected.

Justification: To provide compliance with Provision C.10 the City's MS4 National Pollutant Discharge Elimination System stormwater permit (R2-2015-0049; as amended by R2-2019-0004).

Citywide Signage Program

Location: Citywide

Project Manager: Scott Buenting

Estimated Completion: 2024

Project Description: This program includes designing and installing facility, location and point of interest signs throughout the City.

Justification: The program will enlighten residents and visitors of numerous parks, facilities, and attractions within the City.

Traffic Calming Program

Location: Citywide

Project Manager: Scott Buenting

Estimated Completion: Ongoing Program

Project Description: This program implements traffic calming strategies on roadways that have been identified by residents and confirmed by the Traffic Engineer.

Justification: Excessive speed on residential roadways is a safety concern. This program strives to reduce the risks of traffic accidents throughout the City.

Sewer Main Trenchless Rehabilitation

Location: Citywide

Project Manager: Scott Buenting

Estimated Completion: Ongoing Program

Project Description: This program rehabilitates damaged and deteriorated sanitary sewer pipelines utilizing trenchless methods such as pipe bursting and cured in-place pipe installation.

Justification: Portions of the existing sanitary sewer collection system are damaged or deteriorating and need replacement and upgrades. Trenchless rehabilitation of sanitary sewer pipelines is much less expensive than replacement of the pipeline due to the small excavation required to access the pipelines and minimum damage to the ground surface.

L Street Improvements

Location: L Street between Highway 4 and the Antioch Marina

Project Manager: Scott Buenting

Estimated Completion: 2025

Project Description: This project will consist of modifying and widening portions of the roadway, constructing new concrete curb, gutter, sidewalks and curb cuts, installing landscaping and decorative hardscape, improve bicycle access and upgrading signage and striping throughout the project.

Justification: Improve pedestrian and bicycle safety, traffic flow and aesthetics from Highway 4 to the Marina and the Rivertown District.

Marina Basin Dredging

Location: Antioch Marina

Project Manager: Scott Buenting

Estimated Completion: 2026

Project Description: This project will remove sediment within the Marina basin to maintain an appropriate depth throughout the marina berths and waterway.

Justification: If proper depths are not maintained berths become silted and unusable resulting in a loss of revenue for the marina and loss of rentable spaces for residents.

Water Treatment Plant 'B' Basin Repair/Replacement

Location: Water Treatment Plant

Project Manager: Scott Buenting

Estimated Completion: 2026

Project Description: This project will repair or replace sluice gates, flight drive shafts, housing, and bearings within the basin of Plant "B" at the Water Treatment Plant.

Justification: The original equipment was installed in 1986 and is exposed to aggressive water and is now beginning to fail. To maintain proper operation of the plant, these items need to be replaced or repaired.

Pittsburg / Antioch Water Intertie

Location: Intersection of Delta Fair Blvd. and E. Leland Rd.

Project Manager: Scott Buenting

Estimated Completion: 2024

Project Description: This project will improve the connections between the City of Antioch and City of Pittsburg's water systems.

Justification: The current intertie is unreliable and in the event of an emergency, a reliable interconnection between the cities of Antioch and Pittsburg should be established to help maintain water supply.

Pavement Plugs and Leveling Courses

Location: Citywide

Project Manager: Scott Buenting

Estimated Completion: Ongoing Program

Project Description: This program prepares roadways to receive a full street width surface treatment such as a cape seal or micro-surfacing by constructing asphalt concrete plugs and leveling courses typically within the driving lanes.

Justification: Roadway rehabilitation utilizing asphalt concrete plugs and leveling courses in conjunction with a surface treatment is a cost-effective way of extending the useful life of a roadway.

Streetlighting Improvements

Location: Citywide

Project Manager: Scott Buenting

Estimated Completion: 2026

Project Description: This project will survey the existing street lighting throughout the City and implement improvements to increase safety and decrease energy usage.

Justification: Street lighting is inconsistent in various areas. Evaluating the existing conditions and implementing improvements increases public safety.

Prewett Park Easement Fencing

Location: Prewett Park

Project Manager: Scott Buenting

Estimated Completion: 2024

Project Description: This project will construct a custom wooden fence along the property line between Lone Tree Way and the East Bay Municipal Utility District. The fence will extend a distance of approximately 3,100 feet from Deer Valley Road to the commercial property east of Prewett Park at an estimated cost of \$140 per lineal foot.

Justification: The existing barbed wire fencing is deteriorating and needing replacement.

Prewett Park Pool Resurfacing

Location: Prewett Park

Project Manager: Brad Helfenberger

Estimated Completion: 2024

Project Description: This project will replace the deteriorating pool plaster on multiple pools.

Justification: Industry standard is to replaster commercial pools once every 10 years. None of the Water Park pools have been replastered in that timeframe. Aging pool plaster emits mineral dust that clogs pool filters creating future repairs for filtration systems. Additionally, rough spots where plaster has worn out are currently showing, creating safety hazards for guests, and generally contributing to an undesirable appearance.

Estimated Completion: 2024

Project Description: This project will upgrade facilities, such as data connections, network components, laptops, projectors, and other technology required to effectively operate the City's Emergency Operations Center.

Justification: The Emergency Operations Center is a critical facility when disasters occur. The facilities required to effectively operate the Emergency Operations Center are currently aging and unreliable and need to be upgraded.

Facility Maintenance and Repairs

Location: Citywide

Project Manager: Carlos Zepeda

Estimated Completion: 2024

Project Description: This project consists primarily of roof repairs at several City facilities. There will be additional siding repair at the Prewett Water Park and incidental HVAC ducting repairs due to roof repairs and maintenance.

Justification: Ongoing maintenance of City owned facilities is crucial to continue providing needed services to the City's residents and to maintain the value of the City's assets.

Traffic Signals

Traffic Signal: Heidorn Ranch Road/Prewett Ranch Drive

Location: Heidorn Ranch Road and Prewett Ranch Drive

Project Manager: Scott Buenting

Estimated Completion: 2024

Project Description: This project will install a new traffic signal and related facilities at the intersection of Heidorn Ranch Road and Prewett Ranch Drive.

Justification: This is a developer funded facility constructed for future traffic needs.

Parks & Trails

City Park Landscape Renovation

Location: City Park

Project Manager: Carlos Zepeda

Estimated Completion: 2023

Project Description: This project will renovate and enhance City Park by modifying the rose garden, turf renovation, playground repairs, tree and shrub replacements, and landscape enhancements.

Justification: Upgrades to parks enhance the residents' experience and maintains the value of the City's assets.

Trail Maintenance Program

Location: Mesa Ridge Trail and Deerfield Corridor Trail

Project Manager: Carlos Zepeda

Estimated Completion: Ongoing Program

Project Description: This program will install asphalt concrete overlays on existing paved trails to preserve the integrity of the pathways. The work is scheduled to be performed on Mesa Ridge Trail from Mesa Ridge Drive to Mokelumne and Deerfield Corridor Trail from Lone Tree Way to Prewett Ranch Drive.

Justification: Maintenance of the City's trail system provides safe access through the City's open spaces

Prewett Park Perimeter Fence Replacement

Location: Prewett Park

Project Manager: Scott Buenting

Estimated Completion: 2023

Project Description: This project would replace the rusted and corroded perimeter and interior fence at Prewett Water Park.

Justification: The existing wrought-iron fence around the perimeter and interior of the water park has reached the end of its useful life. It is rusted and corroded and has fallen in some areas. The project is needed to maintain security and improve beautification of the water park.

Integration and Upgrade of Access Control, Surveillance, Monitoring, and Fire Alarm

Location: All City Facilities

Project Manager: Carlos Zepeda

Estimated Completion: 2023

Project Description: This project will include installation of new security access, monitoring and surveillance hardware at all City facilities. Cameras, intrusion, and security access will be added at facilities which currently do not have security monitoring. Existing facilities with security will be upgraded as well to bring all the City's building under one security monitoring systems provider.

Justification: The City seeks to always maintain the security of its employees and infrastructure. Upgrading and adding security and fire monitoring capabilities throughout the City's facilities achieves this goal.

Installation of Police Department Radio Simulcast Tower

Location: 75 Walton Lane

Project Manager: Scott Buenting

Estimated Completion: 2023

Project Description: This project will install a simulcast tower at 75 Walton Lane that will provide additional radio coverage in the southwest part of the City.

Justification: Currently, there is a large "dead" radio coverage area in the southwest part of the city. This creates a significant safety issue for our employees, as well as the public. Installation of the radio simulcast tower will improve response to calls in this area.

Nick Rodriguez Community Center Rehab

Location: Nick Rodriguez Community Center/Antioch Senior Center

Project Manager: Brad Helfenberger

Estimated Completion: 2024

Project Description: This project will remodel, upgrade ADA accessibility and technology, and replace the roof at the Nick Rodriguez Community Center and Antioch Senior Center.

Justification: Currently, the facility is not ADA compliant, existing amenities have reached the end of service life, and hazardous material mitigation will be necessary during construction. Upgrades are needed to provide high quality recreation programs and services to the residents in downtown/northern Antioch.

AMI Water Meter Reading Upgrade

Location: Citywide

Project Manager: Shaun Connelly

Estimated Completion: Ongoing Program

Project Description: This project will replace the existing drive-by Automatic Meter Reading system with Advanced Metering Infrastructure (AMI) which provides real-time water meter reading. This project requires a full retrofit of all existing water meter and meter box lids to allow water meter readings to communicate through a cellular network.

Justification: The cellular water meter upgrade will provide real-time meter readings to residents online. City staff will have access to reliable water meter readings and effectively address customer service concerns. Water conservation is a priority to the City and this system upgrade enables the City to continue improving its conservation efforts.

Wastewater & Storm Drain System

East Antioch Creek Outfall Improvements

Location: East Antioch Creek

Project Manager: Scott Buenting

Estimated Completion: 2024

Project Description: This project will replace the East Antioch Creek outfall near the intersection of Fulton Shipyard Road and McElhaney Road. The work will include replacement of two sections of storm drainpipe with associated flapper gates and reconstructing a deteriorating sanitary sewer pipeline that crosses the outfall piping

Justification: The storm drains and sewer pipelines are deteriorating and causing tidal water to erode soil on the outside of the pipes. These lines affect soil stability under an access road.

Sodium Hypochlorite Injection Distribution System

Location: Water Treatment Plant

Project Manager: Eric Houston

Estimated Completion: 2027

Project Description: This project will add sodium hypochlorite injection facilities at critical points of the distribution system.

Justification: The system has met its useful life and will need to be replaced. The City constantly struggles to maintain water quality in far parts of the system especially during low demand periods. Sodium hypochlorite injection will improve water quality, decrease consumer taste and odor complaints and prevent nitrification.

Water Treatment Plant Variable Frequency Drives

Location: Water Treatment Plant

Project Manager: Eric Houston

Estimated Completion: 2028

Project Description: This project will add variable frequency drives to the City's existing treated water distribution system with the Water Treatment Plant.

Justification: The system will allow operators to slowly ramp up and control the flow of water leaving the treatment plant into the distribution system. The current motors do not allow any modification and are off or on, which is not ideal to maintain pressure and manage the system efficiently. Variable frequency drives will lessen the likelihood of main breaks from turning on and off pumps at the plant and provide a more consistent method of operation.

Polymer Room & Filter Aid Installation

Location: Water Treatment Plant

Project Manager: Eric Houston

Estimated Completion: 2025

Project Description: This project will rehabilitate the existing polymer room and add a filter aid introduction system.

Justification: Rehabilitating the polymer system and adding filter aid to the treatment process will lessen chemical cost, improve water quality and provide a significant benefit in labor cost to operations and maintenance.

Water Treatment Plant Chain and Flights Rehabilitation

Location: Water Treatment Plant

Project Manager: Eric Houston

Estimated Completion: 2025

Project Description: This project will replace the existing chains and flights of the sludge collection and removal system for sedimentation basins at Plant "B".

Justification: The chain and flight system is a critical system component and prone to significant wear over its constant use and needs to be replaced on a routine basis.

Radio Communication Improvements

Location: Various Water Storage Reservoirs and Booster Pump Stations

Project Manager: Marcus Woodland

Estimated Completion: 2023

Project Description: This project will investigate and improve the radio infrastructure used to monitor water treatment facilities.

Justification: The Water Treatment Plant utilizes radio facilities to monitor and operate control over water storage reservoirs and booster pump stations. The existing system is in a state of disrepair and needs to be updated to be able to responsibly manage the system.

Canal Pump Variable Frequency Drives

Location: Canal Pump on Lone Tree Way

Project Manager: Eric Houston

Estimated Completion: 2027

Project Description: This project will install variable frequency drives at the canal pumps.

Justification: The variable frequency drive motors will increase the lifespan of existing pumps and allow operations to fill and drain the Antioch Municipal Reservoir more responsibly and efficiently. This addition will lessen the impact on the reservoirs earthen dam.

Bicycle Garden Construction

Location: Prewett Community Park

Project Manager: Scott Buenting

Estimated Completion: 2024

Project Description: This project will construct the Bicycle Garden within the Prewett Community Park.

Justification: The Bicycle Garden will be a hands-on bicycle training facility and designed like a miniature city streetscape. The park would consist of small roads that weave in and around landscaped areas with smaller scaled versions of real-life traffic features including signals, traffic signs, road markings, bus stops, bike lanes, train tracks, and more to help youth learn the rules-of-the-road. The City intends to pursue grant funding through the One Bay Area Grant program to fund the unfunded portion of the project.

Rivertown Community Space

Location: Southeast Corner of Intersection at 2nd and E Streets

Project Manager: Scott Buenting

Estimated Completion: 2025

Project Description: This project will design and construct improvements at the former Antioch Lumber Storage Yard that will transform the area into a family friendly space.

Justification: This project will provide a community space in the downtown area utilizing the currently vacant parcel.

Roadway Improvements

Antioch School Pedestrian Safety Improvements

Location: Various schools throughout the City

Project Manager: Scott Buenting

Estimated Completion: Ongoing Program

Project Description: The project will install safety improvements, such as Rectangular Rapid Flashing Beacons, a speed radar, pedestrian warning devices, concrete curb ramps, and school crossing signage and legends will be upgraded near Turner Elementary and Fremont Elementary.

Justification: The project will improve access and safety in the vicinity of the elementary schools.

Antioch Community Center Carpet Replacement

Location: Antioch Community Center

Project Manager: Brad Helfenberger

Estimated Completion: 2024

Project Description: This project will replace carpet in staff offices and the Prewett Library.

Justification: The carpet is original and is worn out in high traffic areas. Replacing the carpet is recommended at this time.

Prewett Park Buildings Renovation

Location: Prewett Water Park

Project Manager: Scott Buenting

Estimated Completion: 2026

Project Description: This project will rehabilitate both buildings at the Antioch Water Park, which will include roof and siding of the rear building, new flooring and paint, renovated locker rooms, restrooms and staff areas.

Justification: The Water Park has operated for 27 years without a major renovation. Most of the fixtures have reached the end of useful life. Both buildings are in need of rehabilitation.

Prewett Park Concrete Improvements, Phase 4

Location: Prewett Water Park

Project Manager: Scott Buenting

Estimated Completion: 2024

Project Description: This project will rehabilitate portions of the existing concrete deck and pool coping.

Justification: The deck presents a safety issue in many areas. It is worn, cracked, and rough and will result in patron injury if not addressed soon.

Prewett Park Mechanical and Structural Evaluation

Location: Prewett Water Park

Project Manager: Brad Helfenberger

Estimated Completion: 2024

Project Description: This project will evaluate Antioch Water Park's aging equipment and structures to determine the best course of action for rehabilitation. The Sport Pool is one example which has settled and is no longer level and other equipment has reached its useful life.

Justification: The structures needing repair will eventually become inoperable if not addressed.

Traffic Signals

Trail Crossing Improvements

Location: Various Trail Crossings

Project Manager: Scott Buenting

Estimated Completion: 2026

Project Description: This project will install Hawk signals at trail crossings to enhance pedestrian and bicycle safety

Justification: Installation of Pedestrian Hybrid Beacon (HAWK Signal) at the trail crossings has a potential to greatly enhance pedestrians' safety at locations that are noted as being problematic in the past.

Traffic Signals

Signal System Upgrade at Various Locations

Location: Various Locations

Project Manager: Scott Buenting

Estimated Completion: 2025

Project Description: This project will improve signal hardware including lenses, backplates with retroflective borders, mounting, size, and number. This will also install pedestrian countdown signal heads and install an advance stop bar before cross walk.

Justification: Enhancing the signal hardware will provide better visibility of intersection signals and aid the drivers in advance perception of the upcoming intersection. Installation of pedestrian countdown signal heads will enhance pedestrian safety and result in reduction of collisions between pedestrians and vehicles. Installation of an advance stop bar before crosswalk will enhance pedestrian and bicycle safety by providing a buffer between the vehicles and pedestrians and bicycles.

Water System

Lone Tree Way Booster Pump Station Generator Replacement

Location: 4004 Lone Tree Way

Project Manager: Eric Houston

Estimated Completion: 2024

Project Description: This project will replace the emergency back up generators.

Justification: The current generator is non-operational and at the end of its useful service life and needs to be replaced to maintain operation in the event of a power failure.

Water System

Reservoir Road Rehabilitation

Location: 4040 Lone Tree way

Project Manager: Eric Houston

Estimated Completion: 2024

Project Description: This project will reinforce and repair the access road for the Antioch Municipal Reservoir.

Justification: The road to the dam is eroding and is hazardous to drive when wet.
