The proposed project would involve structural upgrades to the existing wharf located on the southern bank of the San Joaquin River to accommodate vessels arriving at the site to off-load new automobiles. It would also involve the construction of a new pre-engineered metal vehicle processing building of approximately 25,328 square feet; grading and paving of the site for automobile storage; the demolition and construction of new utility connections; and stormwater improvements.
Findings:	The Initial Study prepared by the City was undertaken for the purpose of deciding whether the proposed project may have a significant effect on the environment. On the basis of the Initial Study, City staff has concluded that the proposed project will not have a significant effect on the environment and, therefore, has prepared a Mitigated Negative Declaration.
