**Homeless:**

**Zero: 2016** - The Zero: 2016 Leadership Team from Contra Costa County, including the City's representative (T House), met in a one-day Action Camp with Community Solutions, Santa Cruz County and Sacramento County. In addition to Community Solutions, Abt Associates, the Technical Assistance Collaborative, and member of the Department of Veteran Affairs (DC) were there to facilitate discussion and sharing of information. Contra Costa was ahead of the curve in most respects, in that we have already developed a "By Name" list of Veteran and chronically homeless persons and will be implementing our new Coordinated Entry system this month.

One issue Contra Costa struggles with is the high number of new Veterans entering the homeless services system every month. We really want to understand why these Vets are touching our system. Are they existing residents who have lost their housing? Veterans migrating from other higher cost areas? Vets coming to obtain services at the VA and staying? Vets from other areas being discharged into homeless in this area? Veterans with ties to this area that come back?

The VA and technical services providers helped us with this question, providing us with a survey we can administer to homeless Veterans, as well as assistance on the national level to research specific names for more information on discharge and other info (with appropriate signed releases from the Veterans for some data). This may help the County stem some of the tide of newly homeless Veterans in Contra Costa, so that we can reach our ZERO HOMELESS goal by December 2017! By Zero homeless, we mean that our placement of Veterans into permanent housing will exceed the inflow of newly homeless Vets.

Contra Costa is very fortunate to have access to these partners, and to be able to tap the solutions being developed in the surrounding areas of Sacramento and Santa Cruz, as we attempt to craft the most effective system to eliminate homelessness in our community.

#### Water Distribution

- Tiered water rates are still in effect and were calculated to reflect the cost of service to treat and deliver water to the community. These rates were developed independent of the drought status and will remain in effect. The State has officially declared the drought is over and removed the 25% statewide water conservation goal. Beginning in June of this year, the City of Antioch is mandated to conserve water based on a three year projected "stress test" formula provided by the State. This will remain in effect until January 2017. Based on our results, we have a sufficient water supply for our water production rates and will not have a conservation target. The City of Antioch is no longer requiring restricted watering days. We still encourage all conservation efforts where possible to protect our valuable resource. All of the "prohibited water activities" as outlined by the State are still in effect. This includes: washing off driveways and walkways, irrigating 48 hours after a measurable rainfall and irrigating in such a way that causes runoff to non landscaped areas. To see a complete list, search [saveourwater.com](http://saveourwater.com) or other similar websites on the California drought. Water customers did a fantastic job with their water conservation efforts. We were able to meet our State mandated goal of 28%.

Thank you all for the conservation efforts and success we achieved. Please continue to protect this precious and limited resource.

  - Using a hose without a shut off nozzle.
  - Washing paved or other hard-surfaced areas, including sidewalks, walkways, driveways, patios and parking areas.
